ENVARSUS XR	68992-3040-01	Extended-release tablet	4 mg	100	\$2907.75

Colorado law requires manufacturers to provide the names of generic prescription drugs from the same “therapeutic class” as the marketed drug. Colorado defines “therapeutic class” as “a group of similar drugs that have the same or similar mechanisms of action and are used to treat a specific condition.” The listed generic prescription drugs are in the same “therapeutic class” as ENVARSUS XR: tacrolimus immediate release, cyclosporine. This list does not imply that the products are interchangeable or have the same efficacy or safety. Please refer to each product’s FDA-approved label and indication for further information.

Whole Acquisition Cost (WAC) is the sale price to wholesalers before any discounts or rebates. The actual cost to patients varies based on their insurance coverage. For the exact cost of a prescription, patients should contact their insurance company or pharmacy.

*Pricing as of August 2026. Pricing information listed does not imply safety or efficacy of the product, and no comparisons should be made.
